02 About Us

Company background, manufacturing philosophy, technical diagram and the list of clients served.

HOME / ABOUT US

INDUSTRIAL FOUNDRY EXPERTISE.

Tirupati Metachems Private Limited is an Indian manufacturer specialising in resin-coated sands, foundry fluxes, chemicals and related industrial materials – serving the Indian foundry and metal industries.

ISO 9001-2000

CERTIFIED • DELHI & HARYANA

— ABOUT TIRUPATI METACHEMS

BUILT ON QUALITY, RELIABILITY & TECHNICAL EXPERTISE.

Tirupati Metachems Private Limited is an Indian manufacturer specialising in resin-coated sands, foundry fluxes, chemicals and related industrial materials. The company has built its reputation around quality, reliability and responsive customer service.

The company supplies to foundry and metal industries across India, helping customers produce cleaner, more consistent castings through practical expertise in molten metal treatment and flux technology.

"We have won the trust of our customers and have a strong hold on the local markets."

— WHY TIRUPATI METACHEMS

WHY INDUSTRY TRUSTS US

QUALITY FIRST

Maintaining high quality standards across products and processes.

TECHNOLOGY

Continuously upgrading technology and manufacturing capabilities.

CUSTOM SOLUTIONS

Adapting products to specific customer requirements.

RELIABLE DELIVERY

Focused on consistent and on-time delivery.

TECHNICAL SUPPORT

Responsive troubleshooting and technical assistance.

COST EFFICIENCY

Improving plant operations while maintaining product quality and minimising costs.

— MANUFACTURING PRESENCE

MANUFACTURING CAPABILITY. BUILT FOR RELIABILITY.

Tirupati Metachems manufactures from two locations — Delhi and Haryana — allowing responsive supply across the Indian foundry and metal industries.

DELHI

WORKS — BAWANA, DELHI

C-193, Sec-1, Bawana, Delhi

Registered office and manufacturing base serving customers across the region.

HARYANA

WORKS — SONEPAT, HARYANA

167, HSIDC Rai, G.T. Rd., Sonapat (Haryana)

Additional manufacturing presence supporting supply and capacity.

DELHI & HARYANA — MANUFACTURING PRESENCE

RESIN COATED SAND

RESIN COATED SAND. GRADE-BY-GRADE.

High-grade silica sand (Cochin / Mangalore / quartz based) coated with phenol-formaldehyde resin and catalyst for the shell process. The sand is smooth, free-flowing and dry with good resistance to moisture — used for cores and moulds in shell moulding across grey iron, malleable iron, S.G. iron, steel, stainless steel and non-ferrous foundries.

GRADE	% RESIN	CTS (PSI)	HTS (PSI)	GAS EVOLUTION (CC/GH)	STICK POINT	AFS
A	2.5	175-185	150-160 (10-11)	8.5	100±1	60-65
B	3	225-235	200-210 (14-15)	9.5	100±1	60-65

C	3.3	260-270	235-245 (16-17)	10.2	100±1	60-65
D	3.6	280-290	245-255 (17-18)	11.0	100±1	60-65
E	4	305-315	280-290 (19-20)	12.2	100±1	60-65
F	4.5	345-355	320-330 (22-23)	14.1	100±1	60-65
G	5	445-455	410-430 (28-30)	16.2	100±1	60-65
H	5.5	555-565	500-520 (35-36)	18.1	100±1	60-65

SHELL SAND ADVANTAGES

- ◇ Extremely free-flowing, producing cores and moulds of greater density and less prone to erosion by metal.
- ◇ Hollow cores and moulds are significantly lighter for handling, with the lowest-cost casting production.
- ◇ Deep-drawn patterns with tapers of 0.5° to 3° can be produced by the shell process.
- ◇ High out-of-box strengths yield precise dimensional tolerances, reducing machining, fettling and finishing costs.
- ◇ The shell process eliminates the need for refractory coatings.
- ◇ Cores and moulds remain usable indefinitely – unaffected by humidity and resistant to moisture pickup.
- ◇ Exceptionally resistant to damage during handling and storing.
- ◇ Excellent casting time after time; simple to process, operable with unskilled labour.
- ◇ Low capital investment for core and mould-making equipment, with less sand handling and consumption.

PACKING

Resin Coated Shell Sand is supplied in **50 kg laminated HDPE / PP bags**. Printed matter includes Date of Manufacture, Batch No. & Bag No.

Custom grades and formulations can be discussed with our team for your specific casting requirement.

OUR CLIENTS

TRUSTED BY FOUNDRIES ACROSS INDIA.

We are proud to serve leading foundries, sanitary ware, pump, valve and engineering manufacturers across India – backed by a track record of reliable supply and technical support.

TECHNICAL EXPERTISE

MORE THAN A MANUFACTURER. A TECHNICAL PARTNER.

Hands-on foundry and flux experience informs every product we make. Our expertise covers molten metal treatment, flux technology and foundry processes – applied to help customers troubleshoot and improve plant operation.

01

MOLTEN METAL TREATMENT

Fluxes and practices for gas removal, covering and refining molten metal.

02

FLUX TECHNOLOGY

Formulation and application knowledge in foundry flux chemistry.

03

FOUNDRY APPLICATIONS

Practical support across moulding, casting and melting operations.

04

RESIN COATED SAND

Application guidance for shell moulding and core-making with resin-coated sand.

05

CASTING PROCESSES

Understanding of casting process requirements across metal types.

06

TROUBLESHOOTING

Responsive technical assistance for plant and process issues.

07

PLANT OPERATION IMPROVEMENT

Working alongside customers to improve efficiency while protecting quality.

08

INCLUSION REMOVAL

Specialised fluxes that help remove dissolved non-metallic inclusions from molten metals.

05 Industries & Applications

Lists the sectors the company supplies: Ferrous Casting, Non-Ferrous Casting, Steel Casting, Foundry Moulding, Core Manufacturing, Metal Refining, Induction Furnace Operations and Heat Treatment.

HOME / INDUSTRIES & APPLICATIONS

SUPPORTING CRITICAL CASTING APPLICATIONS.

From ferrous and non-ferrous casting to moulding, core-making, refining, furnace operations and heat treatment – our materials and technical expertise support the processes foundries depend on.

— APPLICATIONS

INDUSTRIES WE SERVE

FERROUS CASTING

Fluxes and materials for iron and steel casting operations.

NON-FERROUS CASTING

Treatment materials for aluminium and non-ferrous metal casting.

STEEL CASTING

Fluxes and materials supporting steel casting processes.

FOUNDRY MOULDING

Resin-coated sand and materials for mould production.

CORE MANUFACTURING

Specialised resin-coated sand for core-making.

METAL REFINING

Fluxes that help remove dissolved non-metallic inclusions.

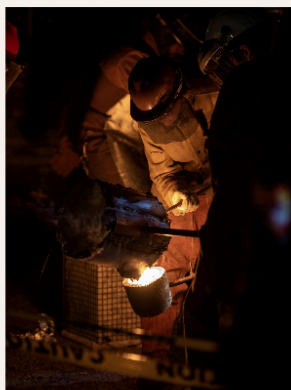

INDUCTION FURNACE OPERATIONS

Lining materials and fluxes for induction furnaces.

HEAT TREATMENT

Heat treatment salts for industrial processing.

TECHNICAL EXPERTISE THAT GOES BEYOND MATERIALS.

Beyond supplying materials, Tirupati Metachems brings practical expertise in molten metal treatment – including the removal of dissolved non-metallic inclusions from molten metals through specialised fluxes – to help foundries produce cleaner, more consistent castings.
